

BUILDER INFORMATION SYSTEM

System Requirements

BIS® Standard and Professional Editions:

- **OS:** Windows® 10 or 11.
- **RAM:** 8 GB minimum. 16 GB or more recommended.
- **CPU:** 2 GHz minimum. 3+ GHz recommended.
- **Disk Space:** 2GB of free space for BIS® programs. 2GB or more of free space for BIS® data. 7,200 rpm hard drives or SSD units recommended.
- **Internet Access:** Not required but recommended for sending email and getting updates.

BIS® (Standard or Professional) can also be run in a peer-to-peer environment but this is **NOT recommended**. Prior to any BIS® installation, users are strongly encouraged to upgrade their systems as necessary to ensure that all features and functions operate as designed in this state-of-the-art accounting program. In addition, the ADMIN user is **strongly encouraged** to check Microsoft's website and download any critical or important operating system updates from Microsoft® at:

<https://support.microsoft.com/en-us/help/12373/windows-update-faq>

BIS® Enterprise Edition:

- **OS:** Windows® Server 2016, 2019 or 2022.
- **RAM:** 1 GB recommended per BIS user.
- **Disk Space:** 2GB of free space for BIS® programs. 2GB or more of free space for BIS® data. 7,200 rpm hard drives or SSD units are recommended.
- **Network:** Gigabit Ethernet with appropriate cabling is strongly recommended. Wireless networks can also be used. The use of Remote Desktop Services (RDS) is also recommended.
- **Internet Access:** Not required but recommended for sending email and getting updates.

BIS® Cloud Edition:

- It runs on a Cloud Server hosted by MICS and can be accessed from most internet browsers and operating systems on computers, tablets and smart phones.
